This is an illustrated curve for the model Y series, describing the open time VS Multi-times rated current in the condition of the room temperature 25°C.
(This curve is for reference only)

This is an illustrated curve for the model Y series, The temperature is measured with silicone oil bath of which temperature is increased at the rate of 0.5°C~1°C/min, with a detection current up to 10mA as the only load.
(This is curve for reference only)

Frequency: Concentration ratio of real opening temperature measured in the preset conditions.
